Special Announcement

Dear friends,

.As you have probably heard, our home country has been hit by the most terrifying floods in the past 120 years. It is too early to tell, but at this moment there are more than 100,000 homes destroyed, more than a million people are cut off from water supplies, and the worst of all, several dozens of people have drowned.

The water damage is extensive, homes have been completely destroyed, and since the floods have happened in the mostly agricultural areas the authorities have banned people from going back to towns due to the extensive cleanup of several tons of dead farm animals and drowned pets.

The victims face homelessness and hunger. People that have lived normal, family lives in a country that has already been impacted by wars, bombardment and poverty, is once again facing destruction.

Hundreds of thousands of volunteers are working day and night, to save people, provide food, water and clean up of the flooded areas.

The 200 Years of Serbs in America and the Tesla Science Foundation has made the decision to organize a fundraiser at our opening reception and dedicate it to the needy in Serbia and Republika Srpska. We will award the best Humanitarian Serbian American Organizations, Churches, individuals and friends of the Serbs that helped us in this tragedy.

We hope to see you there. We welcome any ideas, and will work with all of the helpful

Thank you from all of us at the "200 years of Serbs in America" committee
